Clean Cocktails Book

In Clean Cocktails, holistic health coaches Beth Ritter Nydick and Tara Roscioli bring a clean-living mindset to craft mixology. Their recipes use nothing but naturally low-calorie spirits; fresh juices loaded with vitamins; gentle sweeteners like honey and maple syrup; and anti-inflammatory spices like cinnamon, cayenne, and turmeric—the perfect alternative to drinks that are typically loaded with refined sugars, artificial flavors, and dyes.

Much more than a compendium of cocktails, this book provides recipes for “clean” syrups and bitters so readers can easily build their own delicious drinks. Nydick and Roscioli also highlight ingredients with health benefits, such as ginger (better digestion), cilantro (good for detox), and even vodka (metabolism booster, thanks very much).

Stardust

Frédéric Zaavy's brilliant career as a master jeweler manifested like a meteor but flamed out way before his time. He considered himself the heir of John Baptiste Tavernier, gem dealer to Louis XIV and the inventor of independent business travel, and in his own life was chosen as the top jeweler for the 21st century iteration of Faberge. Zaavy's genius was his painting with stones and the development of remarkable structures for holding those stones almost invisibly. His work expressed the latest in a thousand-year of the highest level of French jewelry creation. The influences on his life and work were myriad. Nature, quantum physics, art, poetry, music, literature, spirituality, and even science fiction all shaped his extraordinary world view and taste. He was a philosopher jeweler. Stardust captures the last year of his life, from the moment when he knew he was soon to die and ending with his life at full throttle shortling before his passing. With a stunning visual narrative by photographers John Bigelow Taylor and Dianne Dubler, and a text by acclaimed French philosophical writer Gilles Hertzog, Zaavy's work and life are presented as a portrait of what was and what could have been.

Sweet. Savory. Social

World-renowned makeup artist Bobbi Brown says: "Vanillamore is a staple of Montclair, and my go-to for every party and event. From cheese platters to sweet spreads, Risa is a force with a unique and interesting vision. Everything she touches looks and tastes extraordinary."

Sweet. Savory. Social. is divided into three sections: desserts, main entrees/appetizers and a guide to entertaining. The order of recipes are set up as building blocks from basic to more advance:

SWEET: features cookies, cakes, caramels, creams, custards, confections, gelato & sorbet and twists on our childhood favorites. Nostalgic treats include Strawberry Cream Puffs and Butter Cake with "goo" that reminds us of sneaking raw cake batter as kids--but this one's safe to eat!

SAVORY: health-enthusiasts will appreciate the salads and buddha bowl recipes. Toasts, crostini and small plates like Turkey Meatballs with Ginger-Scallion Sauce and Chorizo & Figs with Polenta create a simple-yet-sophisticated range of tapas for diverse palates.

SOCIAL: from malted milk and "dessert flights" to chocolate charcuterie boards, this section inspires hosts to create beverages and entertaining spreads from the Sweet and Savory section recipes for their guests.

Hennessy V.S.O.P Privilège x UVA

United Visual Artists (UVA), the London-based artist collective, created a limited edition offering inspired by the V.S.O.P blending process. UVA reflected on the concept of “time blending” as a form of creation and a metaphor for the harmonious combination of eaux-de-vie in the Cognac-making process, each belonging to a specific time in history. The limited edition design captures the essence of UVA’s “Harmonics” kinetic light installation for Hennessy, which reflects on dynamics of immateriality, light and time. The “time capsule” packaging and limited edition V.S.O.P decanter are designed to manipulate light and viewer’s perception – a dynamic visual experience for holiday gifting.

Aeris Phone Case

The Aeris anti-pathogenic phone case is the world's leading self-sanitizing phone case that helps protect people from everyday germs, and most importantly, the COVID-19 virus. Founded by three 2020 college grads, two of whom contracted the virus in March, the company has set out to make these phone cases more readily available by offering a one-for-one model where for every phone case purchased, one is donated to a frontline worker. Aeris has donated over 2,000 phone cases since launching three months ago. Copper is inherently anti-bacterial and not only rapidly inactivates harmful pathogens on its surface, but it also leads to significant reduction in transmission of infections, compared to non-copper surfaces. Phones are potentially the most overlooked "fomites" or transmission vectors of disease, and their patent-pending copper alloy casing protects phones and users from these infectious agents. In addition to the phone case, Aeris Copper has also just launched the Aeris Copper Air Pod case (\$24) and the Aeris Copper wallet (\$59).

Weatherman Umbrellas

Weatherman Umbrellas are the perfect combination of technology, engineering, and state-of-the-art design. After years in the field covering severe weather events, Chief Meteorologist Rick Reichmuth created the umbrella because he could not find one that met his standards for such weather. Weatherman is the highest quality on the market and made from fabric woven with Teflon for superior water resistance as well as industrial strength fiberglass to prevent inverting and breaking in winds as high as 55mph. The free Weatherman app pairs with an optional Droplet Bluetooth tracker to detect the forecast, then reminds you when you need to take your umbrella along. The tracker also ensures you always know where to find your umbrella and alerts you when you may have left it behind. A must-have for the travel lover, the Travel Umbrella is \$54, comes in a variety of colors, weighs under a pound, and is less than 12 inches long.
